Identify controls and variables simpsons worksheet answers

Smiths thinks that a special juice will increase the productivity of workers. It creates two groups of 50 workers each and gives each group the same task (in this case, they're supposed to cut a set of papers). Group A provides special juice for drinking while working. Group B does not provide the special juice. After an hour, Smither counts how much the number of papers each group has made. Group A made 1,587 pile, Class B made 2,113 pile. 4. What should be the Smithers' juice conclusion special by increasing the productivity of 5 workers. How this might experience be to make sure they have the same amount of time; levels of fatigue are similar; provided before. Notice the Homer that his shower is covered in an unusual green sliding. Her friend Barney says her coconut juice is getting rid of the green slices. Homer decided to check this out by spraying half of the shower with coconut juice. He sprayed the other half of the shower with water. After 3 days of treatment there is no change in appearance in the green quake on either side of the shower. 6. What was the first observation? There's green quake that covers Homer in the half shower sprayed with Apparel Water in the 10 green quake. What should Homer's conclusion be? Coconut juice can't get ride of green slippery bart believing that the micro-exposure muscles will become extra strong (maybe it was reading too many radioactive people). She decided to experience this by putting 10 muscles in a micro-iron for 10 seconds. He compared those 10 muscles to another 10 nurses who were not exposed. Its test is conducted in a heavy block of wood that blocks the mouse food. It found that 8 out of 10 of the muscles that micro-walls could push the block away. 7 out of 10 of the non-microwave's mysteries could do the same. 10 nurses who have not been exposed to 14. What should Bart's conclusion be? Radio was blocked had no effect to 15. How could Bart's experience be to Krusty saying that a certain powder lichen was the most new thing on the market, it even claims to cause 50% longer-lasting her long inches. Interested in this product, it buys the itch powder and compares it to its usual product. A test subject (A) was sent with the original powder lichen, and another test subject (B) was watered with the experimental powder coils. Subject A report contains licking for 30 minutes. Topic B reported to have original detergent (Group A) Experimental Power 19. Explains whether the supported advertising data is incorrect. If it were 50 more than other products than the 30 minutes would be changed to an hour BY 45 minutes Lisa is working on a science project. His job is to answer the question: Can Rogoot (which is a commercial hair product) affect the top hair growth speed? His family is willing to volunteer for the experience. Lisa would have put Rogoot on for 1 month vs. producing fake hair in, perhaps Bart. After 1 month he would have to see if anything happened. Control group: the bart hair Variables: Apply Rogoot Dependent Variables: Lisa's Hair After You Finish Using This You Could Rate It By Checking The Box Below That You Think This Post Deserves?
